Work Experience

Glazer/Metal fab

K & m glass - Rochester, MN
July 2019 to Present

I've been doing metal fabrication/glazing for this company. I set up orders, build, customize framing, read blueprints and follow work instructions.

Running production : " If you can find a way to cut a repeated process down with a level of maintained accuracy, you've save yourself time and the company \$\$" .

SMT Machine Operator

Benchmark Electronics - Rochester, MN
April 2018 to June 2019

I set up production according to A predetermined work order that outlines the specs of the operation according to customer needs and demands for the product. To begin operations I set up a line, did inspection/teardown work, organized and setup jobs ,did parts requisition and worked under a microscope. I inspected and identified anomalies in the boards in reference to a blueprint. I calibrated , worked on, loaded pneumatic pick/place machines and was expected to identify problem areas in an operation if they occurred . We were expected to independently make changes on the line according to the manufacturers work instructions. An example of this was the need to epoxy certain heavy parts to a board that would be done as an in between from machine to machine. Attention to detail was very vital in ensuring the operation ran smoothly and cleared inspection. The ability to understand written and oral instruction was a must.
