Passionate hardworking professional looking for a position with potential to grow. Willing to get involved with any project large or small. Great listener, even better leader when needed. My favorite areas of study in school were social responsibility and ethics. A lot of experience with non profit organizations in Knoxville, TN. I believe that anything and everything is possible if your willing to put in the work. One attribute I have naturally is to fix problems, if something doesn't work I seem to have a couple alternative ideas brainstorming.

Authorized to work in the US for any employer
