

Victor Maynard

Production Supervisor and Quality Control

Washington, IL
vzmaynard@gmail.com - 3093408893

To find an employer for the long haul that has opportunity for growth and that provides my family of five with the resources it so desperately needs. Myself my wife and our three wonderful kids the youngest of which having recently been diagnosed with ASD which has made me realize how important it is to utilize every talent and opportunity that we are blessed with as sometimes these things are taken for granted in life!!

WORK EXPERIENCE

Production Supervisor/Manager

BSC Investments LLC - Peoria, IL - 2012 to 2014

of small machine shop which machined castings and small steel parts for various clients. My duties included responsibility for on time delivery and the quality of finished goods as well as safety and personnel management until the business closed in the summer of 2014 due to financial difficulties.

CNC Machinist / Team Lead

Caterpillar Inc - East Peoria, IL - 2008 to 2012

CNC Machinist on the Planet Carrier Line at building KK my job titles were gear machine specialist, and mill drill bore specialist for two years until I was promoted to Caterpillar Production Systems Team Lead in 2010 Where I became responsible for Tracking Machine and Operator Performance, Program Tooling and Machine Tech support, Gage and Process Training, and Certification of new operators, Gage Tracking and Monitoring, Continuous Improvement Coordinator, SPC Tracking Coordinator, Safety Team Coordinator as well as many others until laid off indefinitely in 2012

Driver dispatcher

Frate Service Inc - East Peoria, IL - 2002 to 2008

to over the road regional flatbed semis. I was in charge of thirty to thirty five daily direct reports, I was responsible for outbound loads as well as reloads/inbound loads, payroll, billing, and safety for the entire fleet for six years until I accepted a position at Caterpillar Inc for a large increase in pay.

CNC Machinist

Morton Welding Co - Morton, IL - 2000 to 2002

responsible for set up and operation of CNC lathes and machining centers doing extreme precision work machining transmission valve bodies holding tolerances as tight as a couple microns.

Certification and

Skills Microsoft Office, Word, Excel, Power Point, Multi Line Phone Systems, Social Media, IT Tech,

Networking, Experienced and certified operator on many brands of machines and CNC controllers such as Siemens, Mazatrol, Fanuc, Okuma Genos, Autocon, Hyndai, Bullard Manual and CNC, Cincinatti, Excello, Giddings & Lewis, Haas, Liebherr, Mandelli, Mori Seiki, Mazak, Okuma, Okuma - Howa, Toyoda and many more. I have been running lathes and machining centers since I was sixteen years old. In addition both of my grandfathers worked in machine shops, passing on over one hundred years of knowledge and tools of the machining industry past and present.

Summary

I have six years of experience in an office environment as a dispatcher for a trucking company with thirty direct reports that I was responsible for taking dispatching and following up with loads for them as well as back hauls to get home.

I am a former Caterpillar Production Systems team lead with several years of experience in Tool Design and Implementation, Six Sigma Practices, Lean Manufacturing, Continuous Improvement, Setting Up, Operating, as well as Technical and Programming Support of all types of Manual and CNC Machines including Vertical and Horizontal Lathes and Machining Centers up to 5 axis, Grinders, Shapers, Hobs, Broaches, DPM's as well as many different types of specialty machines, I also have some gas, arc, and mig welding training as well.
