

Patrick Turner

Manufacturing Specialist III

Brighton, CO
pturner652@gmail.com - (303) 345-1390

Extensive knowledge of structural, mild, stainless steel, aluminum, and high nickel based alloys. Vast knowledge of stainless steel structures. Knowledge of heating and cooling to "pull" various metals to specific tolerances. Enthusiastic employee, who is highly motivated along with responsible and committed to exceeding expectations for each job I am given or receive. Previous experience with leadership roles such as a department lead in charge of anywhere from 2 to 6 employees at a time. Experienced with using Microsoft Applications for data entry and recording on a consistent daily basis. Very experienced in inventory control and accuracy.

Highlights:

- Experienced in a wide range of welding operations, mainly TIG.
- Well versed in not only stainless steel applications, but also carbon steel along with experience with high nickel based alloys, such as Hastelloy and C-272.
- Black-smithing as a hobby helps with fabrication and jig set up for various processes.
- I thrive to provide great communication, organization, problem solving, leadership roles
- Have a very good eye for detail in all weld processes that I take part in.
- Hard worker
- Quick learner and adapt easily

WORK EXPERIENCE

Manufacturing Specialist III

Micro Motion - March 2013 to March 2014

Boulder, CO

Welding, wiring, and soldering of Coriolis flow and density meters. Filling out daily production logs, delegation of work assignments for up to and including 4 to 6 coworkers in my department. Attending meetings to help maximize production and update goals for the future. Fill in on the production line to assist in hitting production goals. Also responsible for training and ensuring all expectations of employees working under my supervision were met. Minor conflict resolving and mediation when needed. Regulate and managing scrap accounts and recording trends through operating system, Oracle Applications, for the entire department. Ensuring only qualified welders were working on the correct products. Worked hand and hand with welding engineers to ensure a robotic case welder was programed to correct specifications and tolerances. Weld aluminium fixturing on a regular basis for items being implemented by the engineering crew to the shop floor.

Manufacturing Specialist I

Micro Motion - April 2012 to March 2013

Boulder, CO

Welding, wiring, and soldering Coriolis meters. Fabricating cases ranging from small fractional sized meters to a large high capacity line. Worked on a carbon steel based line called the Titan line, along with a mixed model line primarily focused on stainless steel and hastelloy applications. To even getting my feet wet with some Vacuum Brazing applications using gold and nickel based braze pastes.

Kitting Temporary Employee

Emerson - January 2012 to April 2012

Boulder, CO

Inventory counting with accuracy. Learning a new operating system in a short period, called Oracle Applications, utilizing Hanel lean lifts and forklift operations. Trailer unloading and receiving, putting items away with like items after wards. Pulling parts for allocations and placing them together while using Oracle and CAPS completeness to move the transactions. Parts pulling and delivery to fill parts orders and bins for shop floor use and assembly.

Flow Team/Logistics

Target - Brighton, CO - February 2011 to December 2011

Inventory accuracy, early morning trailer unloading, getting stock to the floor before the store opened at 8:00am. Scanning back stock into designated storing locations. Trusted with stocking and back stocking high dollar security items, where accuracy and speed were essential to keep the position.

Stocker, Cashier, Electronic Associate

Office Depot - January 2011 to November 2011

Brighton, CO

Inventory accuracy, getting stock to the floor in a timely fashion and putting away in appropriate areas. Running an electronic cash register. Helping with computer issues ranging from helping customers find a new computer, to having to wipe out hard drives completely to rid a virus and leaving the computer in its original factory settings.

Sporting Event Team Member

Northwest College - August 2010 to December 2010

Powell, WY

Helped to greet incoming teams, collect statistics, and afterward hand out to specific coaches. Also was in charge of running the clock for sporting events.

Ranch Hand

Northwest College - Powell, WY - August 2010 to December 2010

Catching various game birds to place in predetermined order crates. Routine maintenance of various equipment involving welding, sawing, torch cutting, and heat/hammer bending.

EDUCATION

High School Diploma in extracurricular sports and clubs. Ranging

Holy Family High School - Broomfield, CO
2010

Associate of Arts in Communications

Northwest College - Powell, WY

this college

Associates of Applied Science in communications

Front Range Community College - Westminster, CO

SKILLS

Wide range of welding certification for different alloys and from manual and automated welding processes.
