

## Kevin Hake

I worked at Hewlett-Packard for 35 years as a computer hardware Technician. I wore a pager every day and carried a cellular telephone to assist my customers that had computer contracts with HP. I was on standby one week each month to respond to Computer Service calls that arrived after 5:00 p.m. on weekdays and on the weekends, also.

I worked at Target in Littleton from 10/20/2013 to 1/04/2014 as a night stocker. We would unload semi-trucks on a conveyor belt. After that, we would stock the Grocery Store shelves from 10:00 p.m. to 6:30 a.m. Target customers arrived when the store opened at 9:00 a.m. each day. This was a seasonal job through the holidays.

I have worked with Footprint Retail Services to load and update 7-11 stores starting at 7:00 a.m. until the work was finished. There are usually two of us at each 7-11 to help get through the eight hour shift.
