Objective

To finish an assignment within a timely manner with proficiency and attention to detail

Qualifications

Recognized for quality and a strong work ethic in every position contributed to improve positive results thought effective problem solving.

Education

Tornillo Migrant Program (GED)

Employment

Spartan Medical: Electronic assembly, soldering and quality control. Production of EKG machines working with a variety of hand healed and power tools. Also the use of gauges to determine if product was up to company standards. Soldering was also a big part of the job as well as the knowledge of surface mount, though hole and fine pitch soldering re-work was a must and attention to small parts.

Magnum Plastics: machine operator/plastic injection molding/quality control and inspection. Production of medical supplies while working in a clean room environment. Using a wide range of hand held and power tools. Machine set up and material handling. Inspection of all production before shipping

QA: I would take 5 random parts every two hours to be checked. Using internal and external gravity gauges Id make sure the measurements were accurate and met company standards

Mag Pole: Quality control and inspection to insure that customer got what they paid for data entry was a must and shipping and item tracking

Other info: I am bilingual fluent in Spanish, an easy going person , hardworking with a get it done attitude.
