SUMMARY

I'm a high level worker with an ambition to learn from whomever I'm around and wherever I go. Never settling for second best, I use all I have learned to adjust and adapt into any hat that needs filled. Versatility, a calm and collected mind, but a fast paced work ethic all makes up who I am; and I believe that is somebody you would want to be a part of your team.

ACCOMPLISHMENTS

2008-2010 during the summers I would travel with a group called the Blue Knights Drum & Bugle Corp. Essentially it is like professional marching band. I played tuba for 8 years throughout middle and high school, so being a part of this was a completely new and exciting experience. I traveled the country each summer by bus through 35 states. During my time I developed an extreme work ethic, great people skills, the ability to push my own limits, able to adapt to any situation, multitasking, and high attention to detail.
