WORK EXPERIENCE

Laser Department Manager

Die-Tronics, Inc - Northbrook, IL - 1984 to 2014

I started at Die-Tronics in 1984 as an apprentice for Wire EDM. In 1985 they purchased their first laser machine, a Photon 500 watts laser machine and then they proceeded to purchase another one. In 1992 they purchased a Mitsubishi 1600 watt laser and then two additional laser machines. I was the main contact for the laser department and was in charge of two other workers. I would also fill-in in the Wire EDM department when needed. I worked at Die-Tronics until October 2014, when the company closed.
