## Objective

Pursue a career in the private sector which will allow for optimum growth, utilizing my skills and abilities, with a company that shares in my strong desire to succeed.

## Qualification Highlights

- Completion of a 4 year apprenticeship with emphasis in Sheet Metal (HVAC) and electives in Welding.

## Experience

US Engineering, Loveland, Colorado

### **Journeyman/Foreman, 2005 - Present**

Began employment as an Material Handler before acceptance into the Apprenticeship Program, April 2006. Thru schooling and hands on training my skills and abilities increased daily. Responsibilities include: Initial development of materials and processes involved to complete an HVAC product ready for installation in the field. Production process begins with Blue Print reading for computer input of sheet metal for forming fittings and duct work. Involved in lay out (bench work) of faxes and shop tickets from the field, as well. The ability of reading shop labels for proper process of forming metal using Roto-Dies, Press Brakes, Pittsburgh Machine, TDF Machine, Rolls and numerous varieties of Turning Machines is required. Experience in the areas of MIG Welding, TIG Welding and SMWA, as well. After completion of schooling I was placed into the company "Mentoring Program" and was promoted from Journeyman to Foreman. Responsibilities increased to include: Coordination of all outgoing product into the field for install. Communication with vendors for ordering material for both the shop and field workers. Met with less experienced employees (Apprentices) for evaluating strengths and areas of improvement. Knowledge of all shop equipment for purpose of daily maintenance and repairs as needed.

Vitamin Cottage, Lakewood, Colorado

### **Receiving Manager/All Purpose Clerk, 2004 - 2005**

Responsible for all receiving of incoming and outgoing product from all departments in the store. Cross trained in most departments for the purpose of becoming an "All Purpose Clerk". Use of bar code readers for price changes and updates. Stocking of shelves and displays, as well as, end caps. Maintained a pleasant store environment both inside and out. Use of cash registers and constant customer interaction. Responsible of front end of store for the purpose of customer complaints and returns.

Western States Fire Protection, Englewood, Colorado

### **Apprentice/Temporary Journeyman, 1999 - 2004**

Installation of Fire Protection Systems in commercial buildings. Duties included: Knowledge of blue print reading for correct install of systems. Coordination with all other trades to avoid conflict with the installation. Knowledge of federal and state codes. Unloading of material and staging in a safe

manner. Systems installed included: SCH 10-40 metal, PVC pipe, as well as, copper. experience in soldering and use of pipe threading machines.

## **Education**
