

Thomas Santillanez

265 Wolff St. Denver Co. 80219
(303) 937-7370

Objective

To gain employment in the mechanical or electronic fields.

Qualifications

I have done electronic assembly through hole and surface mount for 7 years. Can follow blue prints and engineers drawings. I know color code. I am class 3 solder certified. I work well in a team or alone.

Education

I received my G.E.D in 1990.

Relevant Experience

4-2002 to present T.G.S Handyman Service.

I started my business in 1991. I began part time, to supplement my income. In 2002 I went full time. In my business I do all types of home repair, painting, plumbing, carpentry, drywall, landscaping, etc.

7-2001 to 3-2002 Electronic assembler/ Conmed Aspen Labs

I built p.c. boards from kits, following engineers drawings, checked boards for any errors, repaired when errors were found. Hand soldered S.M.T. and T.H. components and wires on boards, clipped all long leads, cleaned boards after soldering. again checked boards before sending to Q.C. Also built various cables from drawings, cut all wires to specs, also cut heat shrink to specs, stripped wire ends, used Molex machine to attach wire terminals, attached connectors, applied cable labels. All assemblies were built to I.S.O. 9001 standards.

2-1998 to 4-1999 Bench tech /Downtown radio Inc.

I disassembled car audio systems in order to perform various upgrades, such as changing tape mechs, repaired mechs when possible, repaired switches, changed out switches. Desoldered and soldered S.M.T. and T.H. components on p.c. boards. Also changed C.D. optics, did Q.C. And also did inventory.

3-1997 to 7-1998 Electronic assembler / Macurco Inc.

Subcontract work at home. I stuffed raw P.C. boards, prepped all components, wires resistors, capacitors, etc. Hand soldered all parts on boards, clipped leads, cleaned boards, did Q.C.

Relevant Experience

3-1997 to 6-1997

Electronic assembler / Xel communications

I stuffed P.C. boards on fast moving line, following engineers drawings. Quality control at each station of build. Helped train others in building procedures, Q.C. before boards went to solder wave machine, helped with solder wave when needed. Also helped with any task when asked, such as prepping parts, getting new boards from receiving, unboxing parts, preparing kits. Also did mechanical assembly.

2-1996 to 2-1997

Electronic assembler / Cobe Labs

Stuffed P.C. boards at personal station. I learned solder wave machine, ran boards through Westex washing machine. Quality control before and after wash. Did rework before boards went to test, cleaned wave and wash machines.

Special abilities I am a very fast learner, can use any type of tool, very good with my hands, pay very close attention to detail. Since 1991 I have been self employed as a handyman part time. In 2002 I went full time in my handyman service and have been doing that since then.
