» Objective

To obtain a position in applied biological research involving wildlife and/or environmental concerns

» Education

University of Southern Indiana, Evansville, Indiana
Major: BS Biology – Pre-Wildlife, expected graduation May, 2016

» Skills

Broad verbal communication abilities - handling issues that arise in the retail pet industry
Extensive involvement in equine activities including grooming, training, competitive riding, and general care of horses
Actively pursuing a home-based bearded dragon breeding operation producing high quality lizards for pet stores - additional ownership experience with other reptiles and arachnids
Competent with computers and technology - early adopter of Mac, Windows, and Android products and applications
Completed four years of Spanish at the high school and college level

» Employment Experience

Assistant Manager
Pet Food Center, Evansville, Indiana
November 2011-present

Responsible for supervising employees, maintaining an attractive, clean, and safe workplace, balancing the cash drawer, opening and closing the store, caring for fish, reptiles, birds, small animals, and exotics. Also provide customer service such as recommending proper pet food, animal care and living environment, and administration of over-the-counter medications.
