WORK EXPERIENCE

Precision Machine Operator/Assembler

Absolute Technologies Inc. - Yorba Linda, CA - October 2012 to September 2013

Responsibilities

- Operated multiple machines daily, primarily gear shaping and/or hobbing cnc machines and for some occasions used a conventional Lathe
- Measured parts with micrometers and/or calipers to keep the parts within tolerance(usually ranging from .0005-.001)
- Learned to set up a few shaping machines to cut external splines on various part #s
- Setup involved building tooling fixtures, inputting part measurements, always run the 1st part using EXTREME caution, and chart the first few parts with the Windsol inspection machine to help troubleshoot any issues before starting to run the lot.
- Our shop had major contracts with Eaton/Vickers, Parker/Nichols, GM, Rolls-Royce along with many other Aerospace companys(Rolls-Royce ALWAYS being 1st priority with manditory strict tollerances of less than .0005. Everyone in the shop knew the Rolls-Royce contracts made up a good percentage of the companys profit margin. Id always say if u want your parts made even closer to perfect than usual near-perfect production, you must have some pretty deep pockets.

Car Detailing

Raceway Express Carwash - Fontana, CA - February 2012 to October 2012

Responsibilities

- Apply layers of wax to cars paint job
