Profile

Work as a team member to provide detailed and reliable support in the fields of construction, automotive or manufacturing and “wear as many hats” as requested – more if given the chance! Provide top notch customer service, job skills, organization, initiative, support and represent my employer in a professional, courteous, positive way.

Always on time, ready to work my hardest until the task at hand is complete and proficient. Team player with leadership abilities. Successful completion of the National Guard Program in 2012 plus previous work experience in manufacturing has taught me to be respectful of others, trustworthy and hard working. Years of BMX riding and maintenance and training in Job Corps for automotive technician has nourished creativity and honed in technical skills. Work in manufacturing has further dialed in working with hands and tooling.

Will do whatever it takes to make both customer and employer profitable and satisfied. Overcoming life’s challenges and pushing towards positive success is my current vision in life.
