OBJECTIVE

A versatile professional with 30 years of diverse experience and a wide range of job skills and leadership abilities. Proficient in managing and maintaining expensive equipment. Demonstrates strong capability in leading and organizing teams to achieve common goals. Committed to learning new concepts and continuously improving as an employee. Experienced heavy machinery operator, skilled in loading trucks, operating dump trucks, and fueling machines. Experienced as a fueler, proficient in managing fuel storage and ensuring proper fueling procedures. Additionally, has extensive experience as a carpenter, and is adept at constructing, repairing, and maintaining wooden structures.

EXPERIENCE

Work Experience Overview

Oiler/Fueler at Barnard Construction (2023-2025): Fueled and greased equipment such as light plants, generators, and heavy equipment machinery.

Foreman/Supervisor at Ultimate LLC (2021-2022): Supervised crew, conducted safety meetings, built decks, obtained OSHA certifications.

- Worked with pressure-treated wood to build interior and exterior beams.
- Dug footings for posts and beams.
- Installed hangers and deck joists.
- Constructed weight-bearing headers for roofs and added sheet metal.
- Used power tools, hand tools, and auxiliary instruments effectively.
- Installed structures and fixtures.
- Performed drilling, framing, sanding, sawing, and general woodworking.
- Built decks and staircases.

Sandblast Operator at Blackline Energy Services (2020): Operated sand blast units, managed crew.

Hydrovac Operator at Watkins Construction (2019): Operated equipment, supported hydro vac truck, loaded/unloaded materials.

- Specialize in anomaly work, boring jobs
- Station work, and distinct types of pipe jobs.
- String pipe, crib pipe. Pipe fitted where joints lowered on bend sections.
- Rigged launcher and receivers for bolt up and torque. Sand blasted welds and coated.

Torque up Leadman at Kingsley Constructors Inc (2018-2019): Operated machinery, assigned tasks, fabricated valve systems. Parts runner with truck and trailer.

Responsibilities included installing meter runs for stations and pads, plumbing flare lines for new pipelines, and managing pups, hammer unions, and butterfly valves for frac tank manifolds servicing old lines. Executed roustabout tasks, operated Hydrovac each system to expose existing lines, and used heavy machinery such as excavators and backhoes to dig trenches for pipe installation. Measured and marked areas for pipe installation based on blueprints and specifications, connected pipes using fittings, couplings, or welding methods, ensuring proper alignment to prevent leaks or blockages. Collaborated with construction crew members to coordinate pipe laying activities and strictly adhered to safety protocols to minimize accidents or injuries. Excavated by digging test holes or removing debris from trenches as necessary, working with various materials including PVC, concrete, cast iron, and steel pipes.

Oil Field General Labor at H&S Construction Inc (2017-2018): Performed pipeline tasks, torquing, bolt-up. Sand blasting and operated Skid-steer Tele-handler.

Sand Blasting at Big Country Energy Services (2015-2017): Loaded/unloaded materials, prepared pipes for welding. Sandblasting, coating, spotter

Education

High School Diploma

Mission High School - Mission, TX

CDL Class A with doubles, triples, and tankers endorsement

Sage Truck Driving School

Skills

- Hydro Vac Trucks
- Forklift operation
- Welding expertise
- Heavy equipment operation
- Mechanic experience
- CPR
- Supervisory experience

Certifications and Licenses

- OSHA 10 Certification
- Safe Land Safe Shore Pec card
- OSHA 30 Certification
- Competent person for digging and trenching
