EDUCATION

Industrial Technology and Operations | Illinois Institute of Technology

JANUARY 2016 – DECEMBER 2017

Relevant Coursework: Import/Export, Fundamentals in Industrial Engineering, Sales, Marketing and Product Introduction, Warehousing and Distribution, Industrial Risk Management, Quality Control, Supply Chain Management, Sales and Operations Planning, Purchasing and Entrepreneurship in Industry

Projects

Value Stream Mapping

Study worked to develop value stream mapping strategies for American Wheel Corporation, a Chicago based wheel manufacturing company. The study includes suggestions of outsourcing of turning process and resultant saving to be utilized for automation of existing manually operated polishing process and benefits of such process re-engineering.

Distribution Network Design

Developed distribution network as a part of course project for Signature breads who bake for restaurants and supermarkets serving 50 states in the United States of America. The distribution network is designed based on the center of gravity method and includes all the transportation costs.

Warehouse Facility Layout Design

Designed a warehouse layout design for installing a new warehouse based on multiple product line, storage, dispatch, time, holding space, calculation of supply and demand uncertainties and cost of building and equipping the warehouse design.

Marketing & Sales Plan

Detailed marketing and sales plan prepared for a food drive in with a small soccer field as a part of Marketing, Sales and Product Introduction course. Project includes analysis of Greater Fifth Ward region of Houston, Texas, SWOT analysis, cost analysis, market opportunity and its pricing.

Mechanical Engineering | Osmania University

SEPTEMBER 2011 – MAY 2015

Project: Techno-Economical feasibility of Solar Pump
