OBJECTIVE

EXPERIENCE

Boulder Scientific Company- Chemical Operator

Dealing with Grignard based reactions through distillation, filtrations, and solvent exchanges. Monitor the HMI/PLC system in place Temperature, pressures, and reactivity levels. I add chemicals using 55-gallon drums, or 500,430,120-gallon tanks. Chemical safety is very important as reactions could very easily become uncontrollable. I follow batches provided for me by Chemical engineers. ISO-9000 being used as tracking data for customers specific needs. I neutralize waste depending on organic/inorganic, or aqueous to be transferred to storage tanks. I understand piping/hand-valve flow direction; this is important because I manually operate and load raw materials to vessels. Mechanical aptitude is used regularly as I create fittings for different processes all the time.

December 2022-Current, 4161 Specialty Pl Longmont Co

Ball Aerospace- Aerospace Technician (Ball Aerospace is now Bae Systems)

I manufactured antennas and radars with composite materials. I tested equipment to ensure quality is ready for customers. Inventory control, Soldering, Polyurethane sealing, bonding, cleaning were all process steps I regularly took. I ran and maintained job specific machinery. Further details could be discussed in person, but I was kept to DOD secrecy.

August 2020-November 2022, 9343 W 108th Cir, Broomfield Co

Safeway Distribution- Warehouse Associate

This was a fast paced work environment involving order selection with 100% quality and quantities picked to be shipped to specific stores. I also regularly loaded shipments into trailers. I have extensive experience working with fork trucks and (riding) pallet jacks.

July 2018-August 2020, 4600 Stapleton S Dr, Denver Co

Sashco Inc- Assistant Supervisor/Chemical Operator

I started my career as a warehouse associate and quickly was moved to Chemical Operator. Whilst I was in warehouse operations, I would use fast paced auto filling Proysis machines to fill organic and inorganic sealants to be shipped to retail stores. After moving to Chemical operator, I loaded organic and inorganic materials into batches to create final products.

March 2015- June 2018, 14802 Grant St, Thornton Co

Previous Work Experience

Multiple different warehouses in my earlier career, Advanced Forming Technologies we created mostly gun parts through metal injection molding machines. Royal crest I would work in the cooler all day and supply the nightly drivers with necessary goods to be delivered to homes. would also load trailers to be shipped to be distributed at other Colorado locations.

HORIZON HIGH SCHOOL

5321 E 136th Ave, Thornton Co

Graduated in 2011

SKILLS

PLC/HMI Programs, Forklifts, pallet jacks (electric and manual), 6S, lean manufacturing techniques, OSHA safety and compliancy, Inventory control processes, Chemical safety, Computer skills in all Microsoft programs. Could reobtain my J-standard soldering if needed.

Respirators- APR, SAR, SCBA and PAPR., have been certified in all.

HAZWOPER certified in 24hr class is current and up to date.

ISO-9000 skills and paperwork documentation.

LEADERSHIP

Have been team lead at multiple working locations, and was a assistant supervisor for 1.5 years at Sashco INC.
