WORK
EXPERIENCE

Stored Energy Systems 2018 - 2021 Electronic Assembly Technician

- Built high and low voltage chargers for many companies that required greater amounts of electricity or controlled amounts of electricity, i.e. Hospitals, government officiated services, Navy.
- Read, studied and built chargers based on different blueprints and schematics per customer specifications.
- With each charger built, was in charge of building, inspecting, testing, troubleshooting and packaging.
- Knowledgeable of computer software required such as Sitrine.
- Built complicated units that required assembly of many parts with soldering. Built BBS, Microcabs, NRG-10, NRG-20, TD, and NEMAs.
- Trained new employees on all processes and builds.

Jiffy Lube 2017 — 2018 Auto Technician

- Completes routine services on all make and models of cars including oil changes, differentials, lube exchange, transmission fluid exchanges, air conditioner reconditioning, radiator flushes, and tire rotations.
- Works in a team setting in a high paced and timed environment.
- Assists customers with questions on services and provides expertise advise when it comes to selecting the appropriate service for their vehicles.
- Maintains a clean and organized work space.

Nite Ize 2012 — 2016 Cross Functional Associate (CFA)

- Manufactured thousands of products for pets, camping, flashlights, gear ties, phone accessories, key chains, spokelights, Otter Box products, S-Beiners, rock climbing accessories, fiber optic products, etc..
- Trained new employees for Certification in manufacturing, repair (product and machines) and computer software with the goal of passing their 30/60/90 day certifications to help them excel and grow in the company.
- Trained in a group setting with other trainers with a maximum of 30 trainees specializing in certain products as well as working with the trainees on a one-on-one basis when needed.
- Worked in a time bound setting with deadlines and multiple large orders daily. Serviced and repaired press machines, robotic parts and vacuumed line parts daily.
- Worked on very detailed and precise customer specifications that differed for each product being manufactured.
- Prepared orders for shipping and receiving along with required paperwork.
- Made sure that orders being shipped had the correct product, amount of product as well as the highest quality of products were being shipped to the right customer.

SAE Circuits 2009 —2012 Plater/Screen Room Technician

- Fabricated many types of circuit boards that included widths from a few millimeters to a few inches.
- Worked on circuit boards that would cost anywhere from \$300-\$10,000.
- Worked with many different dangerous chemicals in a safe manner.
- Used Robotic lifts to complete the many different processes that are required when making circuit boards.
- Worked in multiple departments that were very meticulous and important to the functionality of the final product.
