Peak machinery refurbished surplus equipment from paper mills and oil refineries. My job as a manager was to take care of all shipping, making sure everything got done on time.

Education

(IWS) ILLINOIS WELDING SCHOOL
February 2017

HIGHSCHOOL DEPLOMA
June 2015

Skills

Welding (3 years)

Additional Information

Skills & Abilities
MANAGEMENT

I've managed a warehouse that included a multitask schedule. I was completely responsible on how things got done, if they were done on time, and transportation of the equipment.

COMMUNICATION

- I can get along with most people. I prefer working with others on a project other than working alone because I believe there is usually a better way of doing things and it will more likely come out with a group of people.

LEADERSHIP

- I'm a hard worker with ambition to approve on myself each and every day. I also think leadership is shown by your work ethic and your drive.
