### **Metal Melter/ Pourer**

CPP

April 2019 to July 2019

Add metal to molds to compensate for shrinkage.

- Collect samples, or signal workers to sample metal for analysis.
- Examine molds to ensure they are clean, smooth, and properly coated.
- Load specified amounts of metal.
- Position equipment like ladles, grinding wheels, pouring nozzles, or crucibles, or signal other workers to position equipment.
- Pour and regulate the flow of molten metal into molds and forms to produce ingots or other castings.
  
- Pull levers to lift ladle stoppers and to allow molten steel to flow into ingot molds to specified heights.

- Read temperature gauges and observe color changes, then adjust furnace flames, torches, or electrical heating units as necessary to melt metal to specifications.
- Remove metal ingots or cores from molds, using hand tools, cranes, and chain hoists.
- Skim slag or remove excess metal from ingots or equipment, using hand tools, strainers, rakes, or burners; collect scrap for recycling.
- Assemble and embed cores in casting frames, using hand tools and equipment.
- Remove solidified steel or slag from pouring nozzles, using long bars or oxygen burners.
- Repair and maintain metal forms and equipment, using hand tools, sledges, and bars.
- Stencil identifying information on ingots and pigs, using special hand tools.
- Transport metal ingots to storage areas, using forklifts.
