With 7 classmates who I now call my brothers and sisters, our class was made too prepare us for what contractors are looking for; they went around too contractors and asked them what they want from a ideal employee and the skills they are looking for. As of 08/17/2018 I am 80 hours into the program and have learned so many things from reading a tape measurer with 99.999% accuracy too scaffolding and pipe cutting.

By the end of the course 8/31/2018 I will have attained OSHA 30, Flaggers card and CPR certification.

What I have gotten that isn't a document is a sense of pride in my future too obtain Level 3 apprentice and eventually a journeys Men status
