Summary

Self motivated Assembler with 12 years experience skilled at quickly learning new processes, technologies and machinery. Detail oriented, adept at interpreting Manufacturing Operation Procedure's (MOP's), as well as working with others and meeting production deadlines. Safety-conscious, excellent interpersonal skills.

Highlights

- Knowledge of ergonomic principles and how to apply them.
- Performs area clearance and verification of Material Equipment and Documentation (MED's) and executes successive checks on product.
- Accountable for product and process quality and required documentation.
- Responsible for compliance with GMP's, ISO, OSHA, etc, on the manufacturing floor.
- Responsible for stopping production if a quality issue arises and may participate in the resolution process.
- Contributes to team coordination and communication to resolve production issues.
- Actively participates in team development training while taking advantage of continuing education and lifelong learning opportunities.
- Participates in all required quality, process team, and safety training.
- Responsible for providing and receiving constructive feedback without shutting down communication among team members.
- Alerts leadership personnel of coverage problems within a work cell or production area.
- Must be able to work in a clean room environment and perform growing of clean room attire in the allotted time prior to start up.
- Basic understanding of manufacturing operating procedures and quality systems required to assemble, bond, or weld subassemblies or assemblies together.
- Able to read and comprehend manufacturing procedures including assembly prints and engineering drawings. Able to work from written procedures.
- Requires good manual dexterity and visual acuity (ability to distinguish colors).
- Ability to learn and be familiar with process controls and other quality methods with basic computation skills (such as addition, subtraction, multiplication, and division at a minimum of a 9th grade level).
- Basic knowledge of procedures for handling hazardous waste.

Accomplishments

- Learning, teaching and performing procedures and associated documentation to assemble, bond, or weld components or subassemblies together in accordance with assembly drawings and written or verbal procedures.
- Assembly aptitude acquired through experience and on the job training.

Experience

Assembler

October 2000 to November 2012

Terumo BCT – Lakewood, CO

- Set up and performed hand and automatic assembly operations on components, sub-assemblies and assemblies.
- Assessed work for errors or compliance issues and made corrections and modifications when necessary.
- Lubricated and wiped machines, tools and workplace to maintain safety and cleanliness.
- Expertly measured, cut, bent and fitted small tubing to machines.
- Inserted and positioned materials and clamped, spliced and fitted parts.
- Improved knowledge and productivity through continuous education and learning from foreman and senior assemblers.
- Performed and submitted first piece for inspection.
- Retrieved correct materials from product inventory to perform various fabrication duties.
