

**Gary L. Blair**

**271 E. Graves Ave. • Centennial, CO 80121 • 720-313-5001 • glbmirk@yahoo.com**

I am a self-starter, able to work unsupervised with a high level of productivity. I desire a position the will allow me to use my electronic/electrical/mechanical experience in a challenging, productive way.

---

***Work Experience:***

**Concrete Flooring Systems • Shop Coordinator**

I saved the company time and hundreds of dollars by organizing the shop, purchasing supplies from the best possible source and repairing the equipment in a timely manner so that no work time was lost. I taught myself to repair pulse vacuums, floor burnishers, concrete planers and prep masters. I took the shop from a chaotic state to an efficient state that enabled the work crew to pick up supplies and equipment and never be late to the work site.

**Schlumberger • Equipment Operator**

I maintained all equipment related to rigging up and fracking. Operating auxiliary equipment and pump units, I maintained excellent quality control in accordance with company policies and procedures. I recognized equipment malfunctions and corrected them when necessary.

**Metron • Test Technician**

I saved the company thousands of dollars by testing our recently assembled products before they were shipped to the customer. I helped our team streamline procedures so that we tested faster but with more accuracy. I assisted engineers with research , development and evaluation of newly proposed products. I improved our customer service by being able to provide technical support over the phone, by fax and by email. I also performed field service including warranty and compensable service calls as well as start up services for new installations. I also quality-checked parts used for the equipment and programmed, installed and trouble shot variable frequency drives.

**Eastern Slope Electric • Commercial Electrician**

I wired from the ground up four Dollar Tree stores. I integrated HVAC and lighting to be remotely controlled by NOVAR. I also integrated a smoke detection system which would shut down all HVAC units in the event of a fire. I trouble shot down to the component level all systems in the building.

**Satellite Electric • Commercial and Industrial Electrician**

I installed electrical power systems. I designed and debugged systems and ordered parts. I debugged PLC systems in water treatment plants. I wired motor controls for tap water and sewer water in the water treatment planes. I provided technical service the water treatment plants after they were built. I wired electric signage and installed many outdoor projects such as lighting and water features.

**NCAR Marshall Field Site • Radar Technician**

I maintained and operated Doppler weather radar systems. I preformed trouble shooting on C+ software and the hardware and ordered replacement parts. I trained fellow employees how to operate and maintain radar systems. I operated weather radar up to 24 hours a shift and participated in a study of the effects of lightening formation in Florida through the use of three Doppler radar units.

***Equipment efficiency:***

Multimeter, O-scope, mill, lathe, megger, high pot, logic analyzer, trenched, c-band TVRO and DSS installations, frequency analyzer. Fork lift certified.

***Computer efficiency:***

Outlook, Work, Excel, PLC, Itran, CAD, IBM robotics and C++

***Education:***

Denver Institute of Technology, Associate Degree in Electronics  
IBM Robotic Maintenance, Red Rock College  
NEC Code  
Safety Training, Schlumberger
