Work Experience

Hardware Press and CNC Laser Operator

Kiosk Information Systems

2019 to March 2021

Hardware Press responsibilities include reading blueprints from engineers, and installing hardware called out for respective parts, along with checking certain specs to assure that the part and hardware function as designed. CNC Laser Operator responsibilities include loading the engineers program, reading blueprints and making modifications to program when needed, loading sheet metal onto carriage, running loaded program, discarding scrap metal, and grinding "tabs" off of finished parts, as well as laser scanning each part into software to make sure that it passes QA and required specs.

Team Leader

UNITED STATES ARMY AND ARMY RESERVES

2002 to April 2010

Supervised a team of 8 under strenuous conditions and ensured all aspects of their training, readiness, health, and welfare were successfully executed in order to accomplish critical tasks essential to overall military operations during Operation Iraqi Freedom.
