I have many years of experience with all types of controls electrical mechanical ,vfd ,motor liquid level, loop circuits and many more types of controls. I can I'm able to read and understand electrical drawings. I'm very good at troubleshooting systems with or without electrical drawings. I'm able to design and fabricate electrical motor controls and many other controls. If you can explain to me how the system is supposed to work I can draw it electrically. I thrive on solving electrical control problems. I have designed and built hundreds of electrical control panels anything from conveyor systems to system interlock equipment. With a full understanding of you all procedures and requirements if you need help getting your uo label for custom control panels I can help
