Austin, MN

### Education

- Austin high, Austin, MN graduated 2011
- River land, Albert lea, **MN Industrial maintenance & mechanics 2011-**  
will graduate spring of 2013

### Skills & other experiences

- **People skills** -while working at Dolans I learned how to work as a team and get along with everybody on the job so things would always go smoothly. It also taught me how to deal with customers in many different occasions. I am very capable of working with many different people and working as a team to get things done.
- **Ability to operate equipment-** The equipment I have learned how to operate are things such as arc, mig, oxy acetylene, and Tig welding machines also plasma and torch cutting tools, skid loaders, forklifts, hand mills and lathes, hand and pedestal grinders, and basic hand tools.
- **Fabrication-** over the years of working for different people and being exposed to many different machines, I was expected to fix or build things while following a print or sometimes no print just my own measurements. Also my father has a little hobby shop that we are always fixing or building things. Welding is one of my very strong qualities that I am very good at and enjoy doing.
- **Machine Repair-** while working at Dolans I have learned how to fix and grease many different things such as skid loaders. And throughout school I have learned how to repair mills, lathes, grinders, hydraulic presses, and many other hydraulic units' pumps motors and replace belts, gears, and bearings. I have also been around farming for a good part of my life always fixing and replacing tractors and augers.
- **Computer Skills-** I have a good amount of experience with word, excel, and many other programs that I know or have learned while at college.
