Authorized to work in the US for any employer

WORK EXPERIENCE

CNC MACHINIST

PCS Ferguson/Dover - 2015-10 - Present

I am responsible for the setups, program selection, tool and insert changes, offset adjustments, set tool geometry, set work coordinates and minor edits. I am responsible for deburring, quality control, and to maintain a high production rate. I have experience operating Haas, Mori Seiki, with Fanuc controls, Samsung, with Fanuc controls, and Mazak.

IRONWORKER/WELDER

Ironworkers local #24

June 2008 to Oct 2015

I completed a 3 year apprenticeship and have experience Reinforcing Concrete, Structural work, Ornamental, Sheeting and Bridge work.

I have been trained and certified in CPR, First aid, Man lift, Forklift, Fall protection, OSHA 30, Subpart R, Rigging, Cranes-Qualified Signal Person, Shielded Metal arc Welding, Flux Core Arc Welding, and Oxy-fuel Cutting.

CNC MILL OPERATOR

Kurt manufacturing

June 2005 to June 2008

I ran a Niggata, (horizontal milling machine) and Matsurra (vertical milling machine), milling, drilling, boring, and tapping. I was responsible for insert changes, offset adjustments, minor edits, deburring, quality assurance and maintain a high production rate.

MACHINE TOOL OPERATOR

Denver mint

Jan 1995 to June 2005

I ran Okuma CNC single and double turret lathes, and Okuma CNC grinders. I also have experience running Allen Bradley controlled CNC grinders. I was responsible for the setups, program selection, tool and insert changes, set tool geometry, set work coordinates, offset adjustments, parameters, minor edits, deburring, quality control, and production.

I also ran various machine tools, such as manual lathes, surface grinders, and other shop equipment. I have several years experience, using precision measuring tools, such as venire calipers, micrometers, dial indicators, height stands, gage blocks, depth micrometers and dial indicators.

GRINDER A

Coors tek

June 1985 to Dec 1994

I operated several manual grinding machines, such as internal and external cylindrical grinders, blanchard's, double face lapping machines, and other shop equipment. I was responsible to maintain a high production rate. I completed a blueprint reading course, and was trained in Statistical Process Control, to insure quality control.

FORKLIFT OPERATOR

I have experience operating construction forklifts and warehouse forklifts.
