File Bill of Ladings

Warehouse Associate - Material Handler

O'Reilly Auto Parts - Distribution Center - Belleville, MI

June 2019 to August 2020

- Use of head set to pick orders throughout the warehouse using locations and check digits
- Drive an Order Picker to reach parts that are on shelves higher up (Full Case Highs)
- Trained to drive what they refer to as a "boat" to pick lower but bigger parts (Full Case Lows)
- Accuracy and productivity are most important
- Decon parts that are picked, using an RF gun, into totes for each individual store
- Use the Ozark system to print tickets or close totes when needed
- Label totes with correct labels depending on what kind of chemicals may be put in totes ex. LQ, Arrows up, flammable, etc.
- Block and brace all chemicals
- Pack up totes at the end of the day, zip tie, and throw down the line
- Restack our shelves with new totes marked with new labels at the end of every shift
- Stock our shelves with new incoming product as well as return totes all using the RF gun
