OBJECTIVE

No matter what company I work for or what job I do I've always genuinely believed in doing my job to the fullest. The younger generation tends to like to say "well that's not my job" and I pride myself on being the exact opposite. Whatever the job needs I'm willing to do it.

EXPERIENCE

Jbs Greeley beef:QA and management support. March 24, 2014 to May 2017. My main job duties were to inspect the product and make sure there were no foreign objects or any meat that wasn't up to spec. I was doing audits none stop checking the facility and product etc.. I moved departments a few times because I was cross training to become management so there is too much to list.

Bonanza energy:Mash cook.June 2017-Feb 2018. MY job was to start the process of turning corn/milo into ethanol. It was very crucial I watched the temperatures and levels of every tank. I was in charge of adding every ingredient to the mash at the prosise time it was needed. This helped hone my time management skills. I also took samples every 30 minutes to make sure the mash was at the right alchohol level for its it's time in fermentation.

Pilot thomas logistics:Diesel frac tech. March 2018-August 2019. my Job was to get on site and check all the equipment to see the levels of fuel and see if we need to start fueling low equipment. Once we did our initial top of it was my job to keep an eye on all levels for the rest of shift and fuel what need to be fueled. I was in charge of filling out all audits on site. Keeping track of how much fuel we used was very important because the price of fuel can change and you don't want to charge the costumer with the wrong price.

EDUCATION

Northridge high school class of 2013

AWARDS AND ACKNOWLEDGEMENTS

At jbs I was humane handler of the year the year I was working direct with the cattle,other than that they dont acknowledge much.I've always been known by my co-workers and

employers as the hardest worker around. I work exceptionally well with pretty much everybody. I have good communication skills and believe that is key. I've been trained on LOTO, forklift, palletjack, scissor lift and many other heavy equipment.
