Experience

Architectural Sheet Metal Roofing, Black Roofing, 6115 Ben Pl # A, Boulder, CO 80301, (303) 449-5176, Supervisor: Scott Hansen

I'm an assistant architectural metal roofer. I mostly haul materials and get them prepared for installation which includes cutting hook, cap and miters. I've also done a decent amount of waterproofing with caulking as it is an essential part of installing cap metal onto a roof. I make sure that we've got enough supplies for the project that we're on at the given time. I also have done a few gutter systems since starting.

Present

Industrial Crate Manufacturer, MM Solutions, 3915 N Garfield Ave, Loveland, CO 80538, (970) 203-0393, Supervisor: Chris McGraw

I built industrial crates out of wood for different clients used primarily for shipping the various products they sell. I would cut out lumber for projects to be made and make sure that they would arrive to the proper tables. I used a wide variety of hand tools and pneumatic staple/nail guns to assemble the crates as well as inspecting the finished product for any flaws or missing pieces.

Appliance Delivery/Installer, Josh Turner Transportation, 802 Thiesse Dr, Brainerd, MN 56401, (218) 251-2618, Supervisor: Josh Turner

I loaded the truck daily as well as cleaned and maintained the back end of it. Making sure we had the right supplies for our day was my job because if we

November 2017

didn't have what we needed for the day we could potentially run into major issues with an installation. After making contact with the homeowner we'd uninstall old appliances and haul them back to the box truck. After strapping the old appliance down in the truck we unpackage and install the new one. At the end of the day I would unload any old appliances we took and clean out the back of the truck

Assistant Plumber, Terry's Plumbing & Heating, 25808 Scottsdale Dr Nisswa, MN 56468, (218) 831-8093, Supervisor: Terry Oseland

I worked mostly as a laborer for Terry. I was in charge of getting all the tools and setting them up on a job site. I winterized water systems in cabins in the fall, then opened them up for use in the spring time. I was in charge of getting materials ready for Terry which would include cutting and soldering copper pipes to fit or cutting large pvc with a chop saw then fitting it with pipe glue. Really any sort of task I could do to save us time by the end of the day.
