To obtain a position that I could turn into a career; where I can either work alone or in a team while utilizing my knowledge and skills to increase company profit and production.

Authorized to work in the US for any employer

## Work Experience

---

### **Derrick Hand/ Floor Hand**

Gas and Oil - Watford City, ND

April 2018 to March 2020

At C&J Energy, I worked on a Production/Completion Workover Rig as a Derrick hand and floor hand. I received the following certifications: C.P.R. & First Aid, Bloodborne pathogens, H2S, Fit Test, O.S.H.A. safety, Conoco safety, and loader certification. Safety was a must every day. 14hr days.. Each day would start with a J.S.A. meeting, covering goals and all potential hazards from Gas, pinch pts, trapped pressure, working at heights and blowouts, and how to mitigate them. Rooding, rig up, rig down, pump and hardline, open top. Tubing leaks, replace B.H.A.'s, Fish, Run Pump, manifold, B.O.P., mud cross, and understand pressure and well control. Tubing Tongs, rod tongs, Trip in and out from Tubing board, and Rod basket.

### **Operator/Contractor**

Broadcom - Fort Collins, CO

April 2016 to November 2017

At Broadcom we manufactured wafers made of thousands of microchips. Working in a clean suit and clean room every day, paying attention to detail and your surroundings was a must. Also I would have to use critical thinking, a lot of trouble shooting and reasoning to identify the strengths and weakness of alternative solutions. I would operate machines and would have to monitor the usage as well; Watching gauges, dials, and other indicators. Safety Knowledge of equipment and procedures was something we did and had to know daily. I was then assigned to help in the warehouse. We would unload trucks, lift parts and pallets to the correct shelf. Then enter it into a data base. Inventory and auditing was performed routinely as well. Forklifts and dollies were used daily.

Construction Labor PEAK TO PEAK & Sub-Contracting Fort Collins

### **Construction Laborer**

Peak to Peak - Fort Collins, CO

November 2015 to April 2016

We would work 10 to 12hr days and would do all things from Dry Wall, painting, tile, cement, basic electricity and wiring, to everything in between. General and mechanical knowledge of all tools, machines, and their uses. We would Monitor Machines to make sure they are running correctly while using critical thinking and reasoning. Being able to see the big picture and envisioning the final results.

Some times working alone, or in a team; but always being aware of our surrounding. Safety both Public and personal was a most.

### **Sales Consultant & Tech Support**

Qualfon - Fort Collins, CO

August 2013 to November 2015

Assisted customers, built rapport, and matched customers with products that made the most sense. Detailed, customer-oriented thinking. Strategized, but viewed big picture. Sales, customer service skills, general office skills such as emails, follow -up emails, phones, work with both computer software and hardware, trouble-shot tech problems, updated customer's information, data entry, ran credit, took payments and CC information.

### **Labor & Customer Service**

Whistle Clean Car Wash - Fort Collins, CO

March 2012 to October 2012

Weekend manager. Helped open for business, made sure employees in the dry down department were doing and completing their tasks assigned to them in a timely manner while providing excellent customer service. Pulled cars and greeted customers. Small maintenance jobs and product refill. Operations and monitoring of gauges and dials was mostly done in the tunnel where most of the machines are found. I was also responsible for closing.

Manufacturing & Construction - Johnstown, CO

August 2009 to 2011

We would work on mobile homes on production line in a team setting. The department would also hang dry wall and set cabinets. Would use Mechanical knowledge of machines and tools and know their uses. Also Operation Monitoring gauges, and dials to make sure machine is working properly. I did maintenance and repairing. Knowledge of practical technology, also knowledge of Public and personal safety. HAZMAT. Always using critical thinking and using Logic and reasoning.

### **Loan Officer**

Borrowers Choice Lending - Fort Collins, CO

January 2006 to July 2007

Top Jr. Loan Officer, collected important personal information to help match the client with the best loan for their specific needs. Dealt with investments, finances, equity, appraisal appointments and performed credit checks. General office tasks such as conferenced, set strategy for overall profits and better results, faxed, emailed and follow-up with prospects, filed, data entry and more.
