

# Colin C. Harrington

660 Saratoga Way, Windsor CO,

812-270-8218

## OBJECTIVE:

- I am a very motivated person who strives to learn more every day! Team player, but also very self-motivated. I think through the task at hand and look at the smartest way to work through it. I have been known to "think outside of the box." I am a single father who strives to always better myself to provide for my daughter.

## WORK EXPERIENCE:

### Ipea Industries

Extrusion operator, material handler, forklift operator; October 2017 to July 2020

- I operated and maintained an extrusion machine that made gaskets for an array of products. At times I would use a forklift to move and handle material used to make gaskets, also I had to communicate with truck drivers for scheduled pick up and drop off products.

### Infinity Molding & Assembly

Machine Operator, Mold Setter; November 2016 to October 2017

- Maintain multiple injection molding machines as well as mold set up. Program robotics, prep machines for operation. Assist production. I was responsible for knowing the setup sheets and diagrams for each mold and making sure the

mold was correctly installed along with all necessary hook ups, water lines hydraulic lines and pneumatic systems.

## **Odyssey Construction**

CNC operator, Framer, Carpenter, Programmer, welder, demo; September 2014 to Nov 2016

- Set up CNC router along with operating and maintaining it. Framing and building walls, doorways, floors, demolition team, basic welding. Overseeing other workers.

## **Eye-Mart**

Technician; April 2013 to July 2014

- Produced lenses for prescription glasses, inspected them for any defects and ensured quality and customer satisfaction!

## **The Vault**

Server, bartender; Feb 2013 to August 2014

- Performed all duties of a bartender/ server, multiple transactions at a time, also could perform well under pressure in high stress situations.\_

## **Bar Louie**

Line Cook, Sauté cook, prep, busser, maintenance; February 2011 to January 2013

- I would open the restaurant and prep food for the day, then as customers would come in I would take and make orders as needed and see to it that the orders were correct and to which section they needed to go to. Troubleshoot

issues, equipment repairs, such as: broken stoves, malfunctioning pipes or any issues behind the bar

**Skills:**

Mechanically inclined, power tools, injection molding set up, extrusion operator, CNC set up and operation, quality inspection, assembly, carpentry, strict attention to detail, supervisor skills, multi-tasker, forklift, resin handler,

**EDUCATION:**

**F.J. Reitz Highschool**

Highschool Diploma, Graduated 2008

- Business management and entrepreneurship.
