My experience and background fulfills the needs for the position in your company that i am applying for. I have the insight to succeed in this diverse and transforming field of work. I am excited about new opportunies and I am eager to take on all responsibilities to become an asset to your company. I have excellent communication skills and many mechanical skills along with the common sense needed to perform the job accurately. I am a definite team player and I am able to multitask outside of my job description to cater to any needs to better the company. I have strong leadership skills while still very compassionate about the job. I would appreciate the opportunity to prove to you and your company my work ethic. I take pride in my abilities in what I have accomplished and I am looking forward to a new career with your company.

Willing to relocate: Anywhere

Authorized to work in the US for any employer

Work Experience

Delivery Route Driver

Welding and Oxygen - Dallas, TX
July 2016 to September 2018

I obtained my CDL with HAZMAT. I had a set route where I delivered medical oxygen bottles to various doctors offices and hospitals. I also delivered other supplies such as welding supplies and tanks. The route was on average 20 stops a day and I always provided fast friendly customer service. While in between stops I also stopped at different locations to gain new customers for my company.

Southern Tire Mart Customer Service

Front Counter
February 2016 to May 2016

Commercial fleet tire sales. I helped answer phone calls and dispatch when needed. I invoiced customers and collected PO numbers using Madco Software. I also helped cash out customers when necessary. I often wrote up reports for commercial trucks when services were needed or any other orders were placed. Sales were done outside going from business to business to gain new customers.

MWD Field Specialist

National Oilwell Varco - Hobbs, NM
June 2014 to January 2016

As a Field Technician I would Rig up/Rig down surface gear, build MWD tool on sight and place it into a collar. Input all information into The tolteq system. As an unmanned tool I would Troubleshoot MWD and Drift tool on the job or remotely via phone or computer if another tech was present. I would also help run the remote operations making sure all jobs were drilling ahead without any problems and help field tech,company men and drillers to troubleshoot problems. When on location at the end of the well I would collect all data and send it into my coordinator and make an invoice

Field Technician Ryan Directional

MWD

May 2013 to June 2014

I rig up and rid down surface gear at location, Strapped BHA for MWD tools and input all information into Lavorsab I would show the drillers and company men how to take surveys correctly and felt comfortable with our product. At the end of a MWD well I would collect all data and edit surveys for Railroad state certification. I often filled out BHA drawings and measurements or strapped pipe, rig up forms, lost in hole, drillers log and courtesy sheets, JSA, etc. I also prepared invoices on services provided for the company as instructed by my coordinator.

Machine Operator Action Machines

March 2008 to August 2012

I operated CNC machines with Fanuc Controls. I maintained paperwork and daily reports for ISO. I kept up maintenance on machines and other equipment around the shop. I also maintained and handled suppliers along with third party vendor relationships. I kept inventory on materials, tooling and I ordered new inventory when needed. I maintained daily cost and paperwork along with establishing and maintaining a professional work environment for all of the employees.

Technology Sales Associate Staples

July 2006 to January 2007

I was a sales associate for Computers, Hardware, and Software Replacement along with accidental plan sales. I assisted customers with technology information and sales and answered questions and addressed any concerns. I maintained and managed inventory daily. (I was awarded for being the top protection plan sales in the region many months in a row)

MWD Field Specialist

Learn Drilling - Conroe, TX

November 2012

I built up MWD kit boxes to be shipped out to field. I took inventory and inspected equipment coming in from the field on a daily basis. I broke down tool strings battery and Pulsar's, Milled shoes and other related parts for rework. I cleaned equipment and preformed other basic shop duties.
