Professional Summary

Dynamic professional with over 1+ years of relevant experience in sheet metal fabrication and CNC machine operation. Demonstrates expertise in operating press brake and mold machines, reading blueprints, and performing precise angle corrections. Committed to safety, measurement accuracy, and efficient production while adapting to fast-paced manufacturing environments.

Work Experience

Machine Operator

Clayens-Loveland, CO

June 2025 to Present

- Operated CNC machines and mold press machines to produce precision metal molding parts according to specifications
- Utilized measuring instruments and calipers to ensure parts met quality and dimensional standards
- Interpreted production documents and followed company guidelines to maintain high quality and safety standards
- Applied attention to detail and problem-solving skills to identify and correct minor production issues

Sheet Metal Fabricator

Architectural Sheet Metal-Fort Collins, CO

January 2024 to June 2025

- Operated press brake machine to bend sheet metal to precise angles and customer specifications
- Interpreted blueprints and production documents to ensure correct geometry and tolerances
- Used measuring instruments and basic math to verify part dimensions and make angle corrections
- Drove forklift to safely move materials and finished parts within the facility

Garage Door Installer

Garage door service and sales-Loveland, CO

January 2023 to February 2023

- Installed and serviced garage doors and openers, utilizing hand and power tools for assembly and adjustments
- Communicated with customers to assess needs and provide quality service
- Assisted with material handling and ensured safe work practices on job sites
- Gained experience in troubleshooting and problem-solving during installations

Machine Operator

Parkway Products-Fort Collins, CO

- Used measuring tools and calipers to inspect plastic parts for quality and dimensional accuracy
- Made manual adjustments to parts and ensured compliance with production requirements
- Packaged finished products and maintained accurate production records

- Followed safety protocols and quality control processes throughout shift

Education

None (None)

Rocky Mountain High School-Fort Collins, CO

None

Skills

Press brake machine **Sheet metal fabrication** **CNC programming** **Blueprint specification interpretation** **Measuring instruments** **Precision measurement in machining** **Dimensional measurements** **Quality control processes utilized** **Hand tools** **Forming tools** **Math** **Cutting** **Attention to detail** **Material handling equipment operation** **Machine operation**
