507-341-0279

Graduated college while working a full time maintenance position for the whole 2 year program while meeting all the course requirements. Certified welder, machinist, and a licensed boiler operator only two years out of high school. Always show great enthusiasm in the work place to ensure a good work experience and environment for every one of the employees. Areas of expertise include welding, machining, and quality maintenance. Always look to expand knowledge and learn things out of ones comfort zone.

Willing to relocate: Anywhere

Authorized to work in the US for any employer

Work Experience

Maintenance Technician

Chippewa Packaging - Saint Peter, MN

February 2019 to Present

I perform daily, weekly, and monthly pms on all production equipment. Mostly consists of DM work during production hours. Fabricate in house jigs and fixtures for machines as well as guards and shields. Order parts when needed, set up and tear down production lines for different jobs ensuring things are in order when workers arrive for their shift.

Boiler Operator

Tony Downs Foods - Madelia, MN

August 2018 to February 2019

I was in charge of operating the plants high pressure boiler system, hot oil system, and NH3 system. Other duties consisted of fixing any broken or damaged steam or water piping as well as maintaining drains, performed routine maintenance on boilers, pumps, and NH3 screw compressors.

Maintenance Technician

Albert Lea Select Foods - Albert Lea, MN

September 2016 to August 2018

Perform routine maintenance on all machines including preventive, reactive, and predictive maintenance during production hours while implementing safety procedures. Worked around water treatment system. Trouble shooting, hydraulic, electrical, and mechanical problems regularly keeping to USDA health standards. Trained in CPR, fall protection, certified man lift operator, and certified forklift operator. Working in teams or as an individual when applicable.
