Authorized to work in the US for any employer

## Work Experience

---

### **Setup technician**

Sil-Pro, LLC - Delano, MN

March 2012 to August 2018

I was responsible for setting up LSR Sodic and Boy hydraulic presses for the next scheduled production run. This entailed switching out the previous molding tool for the required one, disassembling; cleaning and reassembling the injection unit and nozzle, ensuring that the press was running the correct molding program and that good product was being made before turning the press over to the operator.

Other duties included minor mechanical and electrical repair, mold upkeep and cleaning as well as running a press when needed.

### **Production operator**

Boston Scientific - Maple Grove, MN

2006 to 2011

Was part of an assembly line that made Sterling over-the-wire catheters. I primarily ran the proximal laser weld. Work was extremely fast paced and highly demanding.

## Education

---

### **High school**

Elk River Senior High School - Elk River, MN

2002 to 2005

### **High school or equivalent**
