## Skills:

- Machine Operations
- Cell (Multiple machines at once)
- Finisher/Hand File/Electric Hand Drill
- Tools/gauges
- Inspection
- Shipping and Receiving
- Material Handling
- Plastic and Ceramic Molding experience
- Complete logs and records
- Forklift

## Experience

*Pcc Airfoils - Wickliffe, OH February 2007- July 2016*

*Machine Operator/Material Handler/Quality*

Operate a variety of molding machines to produce moderately complex ceramic patterns and gating components of the highest quality.

Followed SOP for mixing proper amounts of ceramics and poured compound into molds

Load and unload different ceramic parts into different ceramic molds.

Clean sand and different materials off of various parts before sending them to inspection.

Rotate and turn heat cars through a furnace

Document quantity and quality of parts being loaded and unloaded

Complete logs and records, document any modifications to process, to ensure all production and quality standards were met.

Cleaning, inspecting and organizing of production area and machinery.

Created labels on computer for airplane parts

Engraved reels into parts assigning numbers to all materials

Operated ultra-sonic wall machine.

Worked in finishing department, deburring and stoning

Inspected, dot marked and prepared for shipping

*Niagra Bottling - Aurora, CO August 2016-Present*
