# Darcy Rose

**Business Analyst**

Fort Collins, CO

[darcyerose@gmail.com](mailto:darcyerose@gmail.com)

970 402 8797

Business Analyst with a strong background in statistical analysis, a passion for data, and excellent written and oral communication skills. I most recently worked across the Reporting, Data Visualization, and Business Intelligence teams to manage co-dependencies between teams, write clear product specifications, and ensure that the data we present to customers is clear and consistent. I also contributed to customer research initiatives in order to better understand how our products are used by our customers and how we can improve that experience. My unique background as a Linguistics PhD makes me especially suited to work as a Business Analyst in a data-driven environment due to my experience quickly identifying patterns in complex data sets, communicating findings to both technical and non-technical audiences, and working collaboratively with colleagues across the fields of linguistics, computer science, psychology, and human-technology interaction.

## Work Experience

### Business Analyst

Verizon Connect

October 2018 to March 2019

o Defined requirements across the Reporting, Data Visualization, and Business Intelligence teams.
o Ensured that the roadmaps of interdependent cross-functional teams aligned.
o Acted as a bridge between Product and Engineering teams located in different countries.

### Data Management Specialist

Verizon Connect

January 2018 to October 2018

o Organized the migration of all customer-facing reports to a new analytics server.
o Ensured consistency and accuracy of both data and design of reports.
o Enabled accurate communication between software developers, data engineers, and designers.

### Research Assistant

University of Canterbury

2017 to 2017

o Facilitated automatic annotation of facial features for a corpus of 900+ audio-visual recordings.

## Education

### Doctorate in Linguistics

University of Canterbury - Christchurch, Canterbury

October 2013 to September 2017

### Master's in Linguistics

Indiana University-Bloomington - Bloomington, IN

## Awards

### Incubate Hackathon 2018 4th Place
October 2018

Worked with a cross-functional team to develop 'Latch', a feature gating application that allows for targeted testing and analysis of new features before full release. The application was developed during a three-day hackathon, after which I presented our product to company leadership.

## Assessments

### Data Analysis — Highly Proficient
May 2019

Measures a candidate's skill in interpreting and producing graphs, identifying trends, and drawing justifiable conclusions from data.
