

David Wagoner

Maintenance Mechanic

Bloomington, MN

Beldors@yahoo.com

763-744-6675

Motivated and experienced mechanical repair and maintenance technician. A dedicated mechanic with working knowledge of specialized tools including pressure gauges and continuity tester volt/ Ohm meter. An ability to independently complete detailed projects with complex manufacturer specifications. Team leader with a focus on client satisfaction and work safety.

Work Experience

Maintenance Mechanic

Rise Baking Company & New French Bakery - Minneapolis, MN

2013 to 2018

Maintain food servicing equipment including anhydrous ammonia cooling and freezing systems, freezers, coolers, bread sealing equipment, conveyor and proofer systems, box makers and sealers, and mixers. Complete safety inspections, forklift repair, and pallet jack repair. Complete troubleshooting and repair for pneumatic systems.

Accomplishments:

- Contribute to low costs by sourcing and ordering parts at low price points
- Maintain low safety incident scores by completing preventative maintenance on equipment and fix issues immediately

Field Service Technician

Heike's Equipment - Farmington, MN

2006 to 2009

Installed and maintained complex and differing equipment including mechanical, electrical, AC/ DC systems, hydraulics, pneumatics, gasoline, and diesel all within manufacturer specifications. Completed operation checks for worn or damaged parts. Completed welding tasks, utilized special equipment when necessary, and applied trade practices when diagnosing equipment malfunctions.

Accomplishments:

- Increased earnings by 23% by suggesting new products consistently
- Established company forms for field technicians to increase detailed communication with the administrative team

Field Service Technician

Forklifts of MN - Ham Lake, MN

2005 to 2006

Referred to manufacturers' diagrams, specifications, schematics, and wiring diagrams to diagnose equipment malfunctions. Completed oxygen acetylene, arc, wire feed, plasma cutting, MIG and TIG welding. Performed preventative maintenance to ensure safety was a top priority. Utilized specialty equipment when necessary.

Accomplishments:

- Increased client base by encouraging previous customer to refer services and through the utilization of cold calling

Road Service Technician

Minnesota Supply - Eden Prairie, MN
1994 to 2006

Completed electrical, diesel, and forklift repairs. Gained knowledge of how to utilize pressure gauges, multimeter, volt/ohmmeter, diode tester, temperature, and AC/DC continuity tester; additionally, trained new technicians on the equipment. Ensured safety parameters were set and maintained.

Accomplishments:

- Created and implemented a new preventative maintenance system and schedule for all road technicians

Special Purpose Vehicle Mechanic

United States Air Force
1986 to 2004

Completed mechanical training to perform maintenance on construction and heavy equipment including forklifts, cranes, construction vehicles, fire trucks, refuelers, bulldozers, backhoes, dump trucks, Snow Plows And snow blowers, cargo loaders, pole diggers, street sweepers, 5-10-ton tractor trailers, 10-ton wreckers, and towing vehicles. CPR instructor and trained in HAZMAT, supervisor responsibilities, explosive ordinance disposal (EOD), vehicle and decontamination.

Accomplishments:

- Appointed the Safety Representative for the 934th transportation Squadron
- Trainer for mechanics

Skills

hydraulics (4 years), Mechanically Inclined (Less than 1 year), Problem-Solving (Less than 1 year), Project Management (Less than 1 year), welding (5 years)

Additional Information

Core Competencies:

Mechanically Inclined Team Collaboration Knowledge of Safety Standards
Knowledge of Hydraulics Principles Strong Problem-Solving Skills Project Management
Multiple Welding Techniques Very Organized Decision Making Skills
