Objective

I am a resilient individual with diverse knowledge in quality control, OGP precision measuring instruments (SmartScope), warehousing, and assembling field with a strong work ethic. I can promptly learn, multitask and adapt and work efficiently. I have strong background in Quality Control, working with various measuring tools and testing equipment to ensure proper specs.

Skills

- Experience work with blueprint/MOP/SOP Interpretation
- Performs jobs with regulatory, quality, and safety standards per protocol
- Acquainted with environmental working standards (clean room, smock room)
- Familiar with warehouse procedures and operations
- Knowledgeable in assembly line operations
- Familiar with machinery set up and component assembly
- Knowledgeable with Computer

Experience

Thermon Heating System

Littleton, Colorado. Feb 2021 to Aug 2022

Quality Control Testor

- Review drawings, test procedures and test heaters with high voltage to ensure correct functionality, all with ISO standards
- Point to point diagraming to ensure proper wiring
- Programming/uploading Seimen boards with correct files
- Maintaining proper equipment and testing calibration
- Maintain records of heaters, their test results via spreadsheet/paperwork and sending COCs to customers

RJR Technologies

Phoenix, Arizona. March 2019 to April 2020

Lead QA Tech

- Engineered and wrote programs to be used with measuring dimensions to exact spec, very high tolerances
- Provide day-to-day quality check points to make sure production is correct
- Measure random control sample to make sure production products are in tolerance.

L3 Technologies, Aerospace, and Defense

Phoenix, Arizona. Jan 2017 to March 2019

Production Lead

- Able to read and interpret blueprints, work procedures, and document
- Worked with various high level machine and tooling
- Security Clearance level 1
- Signed NDA

TerumoBCT

Lakewood, Colorado. August 2011 to November 2016

Production Assembler, QA Tech, Material Handler

- Worked effectively with well over 45+ team members each shift. Mastered the Manufacturing Operating Procedure to construct a high quality medical product.
- Adhered to a clean room environment by donning boots, smocks, hoods, and gloves throughout shift.
- Accountability for each final product. Illustrated the value of work ethic for each 12 hour shift.
- Quality control to ensure materials are within tolerance and spec

Education

Front Range Community College

General Education

Westminister, Colorado

2011 -
