Experience

08/2017-2018

Quality Technician / Precious Plates, Wheatfield, NY

Operating of x-ray machines. Detecting defected parts under the scope. Calling in operators to have them raise or lower the levels of metals in the mixture to enhance the quality of the parts. Stripping of the parts to check chemical and heat resistance. Imputing the measurements and levels into the computer for records.

04/2014-08/2017

Machine Operator/Assembly / Silipos, Wheatfield NY

Inserting parts at a fast pace into machine to be sealed and checking for defecting parts, also packing the products and sending them off to shipment. Coating product and packing them to be sent to certain locations. Putting parts onto the machine and dipping them into melted gel and then sending it off to inspection for further processing,
