

601 Cross Street, Apt. 19
College Station, Texas 77840

September 29, 2012

Dear Recruiting Manager:

I am writing to express my interest in the Industrial Engineer position (Req: IE06132012) in your organization. I learnt about this opportunity through the online job posting on Towerjazz's career website. I firmly believe that my education and internship experience makes me a competitive candidate for this position.

Currently, I am pursuing my Master's in Industrial Engineering at Texas A&M University with overall GPA of 3.9 (out of 4.0). My most recent internship was with ELGI Rubber Company LLC, Luling, TX, as a Process Development Engineer. My job description was to optimize and automate the flow of materials in the packaging department. I helped the organization cut down labor cost by 30% and lead time by 25%. Apart from this, I have successfully completed various optimization and simulation projects, presented papers in national and international conferences, and organized workshops and national symposiums on mathematical modeling and non-traditional optimization techniques. I believe that my qualities, as an enthusiastic self-learner and out of the box thinker, along with my prior experience and education precisely fit this particular job profile. I will complete my Master's by December, 2012 and therefore I look at this as the opportune time for getting in touch with you.

I have attached a copy of my resume, which more fully details my qualification for this position. I look forward to having the opportunity to meet with you and to discuss my qualifications further. Please contact me at 979-450-4767 or karevaradharaj@gmail.com if you have any questions or would like additional information.

Thank you very kindly for considering my application.

Sincerely,
Karevaradharaj Doraiswamy Selvaraj
