Professional Summary

Experience includes starting orders at a fast food restaurant and working the drive through window, taking cash and exchanging orders and checking for accuracy. Worked at a regional distribution center warehouse stocking the shelves and pulling orders. Driver for local auto parts stores. Promoted to regional driver to and from the distribution center gaining trust and credibility. Helped with hydraulic changeovers and other hydraulic work related to automobiles. My most important job was being a stay at home dad for around a year while his mother got her foot in the door to her career field after graduating CU Boulder. My last job was quite brutal, but I also really enjoyed it. I operated a pallet jack and forklift, depending on the order being built, for American Eagle Distribution.

Objective: To find a challenging position that my organizational and computer skills could be utilized.
