I am seeking employment in a field that will keep me active and am willing to start at any level. I have a strong and honest work ethic and provide a positive attitude to those around me. I worked at The Canyon Bake House for over three years. I started as a Production Worker on the second shift, was promoted to Lead and then promoted to the second-shift supervisor. I spent two years as Production Worker learning each station in the process of baking, including scaling and mixing ingredients, forming loaves, baking, slicing and bagging and case packing. As Lead, I was responsible for helping each station stay in line and flowing at the same pace to meet quota. I was also in charge of attendance, hygiene, warehouse pulls and returns and sanitation of equipment. I supervised for about a year. Supervisors take responsibility in all the above while ensuring the bakery is a safe work place. My shift oversaw the weekly shut down and cleaning which involved overtime hours, weekly shift reports and lock up. All of this was done while making a consumable product which requires following strict health codes. I recommended employees to be hired if I felt they met my requirements. I recommended employees be fired if they could not meet health and safety requirements. My shift under went two major FDA inspections that included heavy testing. We passed with only minor deviations.

Work Experience

Shipping and receiving lead

Bio Char Now - Berthoud, CO
January 2021 to May 2023

lead shipping and receiving
