Work Experience

Driver

Smile Final Mile - Aurora, CO
March 2020 to May 2020

This company is a sub contractor for Amazon. We would have about fifty stops a day delivering all the big packages for Amazon. My day would start by loading my truck in order last delivery first and first one last. I would deliver the package ring the door bell and scan the package and take a picture of it then off to the next stop.

Dock Worker/Forklift Operator

XPO Logistics
August 2019 to February 2020

I was a dock worker. My night consist of coming in at midnight and checking out a scanner and a forklift. I would be responsible for unloading trailers that have just come in and breaking them down and sending each pallet to the new trailer for its delivery.

Driver/Mechanic

Sunbelt Rentals - Denver, CO
July 2018 to August 2019

I worked in the floor division at sunbelt rentals. We carried all floor machines from as small as residential carpet cleaners to industrial sized concrete cleaners. We would rent equipment to small business as well as big corporations. I would be responsible for delivering rentals. Upon arrival I would give the customer a run down about the machine how to run it and make sure the customer can run the machine by themselves comfortably. I was also responsible for picking the machines up when the customer was done with the rental returning to the shop to unload and get ready for the next rental. If the machine came back broken or needing necessary upkeep I would fix it in the shop and order parts if need be. Usually we would have a driver and a shop mechanic but we where short a driver for about five months so I started being a driver as well as a mechanic .

Driver

Copper State Bolt & Nut Co - Centennial, CO
December 2015 to April 2018

I was a driver at this company. I drove a 24ft flat bed truck. I was responsible for loading my own truck in the morning using a fork lift. After being loaded I would route my deliveries and deliver my pallets. Usually each customer hot one or two pallets and my deliveries where all over colorado. After my

deliveries where complete I would get a few pick ups I would have to get before I came back to the shop.

Driver/Courier

Shamrock deliveries/courier - Centennial, CO
May 2013 to December 2015

This company was a courier company I for the most part drove a 26ft flat box truck but one or two days out of the week I would drive a van. I would go about my day usually picking up a few pallets from companies that either they forgot to put on the normal truck or where running late. So they would call shamrock to come that same day and deliver what there drivers where not able to deliver I would make sure they still got there deliveries made. I would drive a lot on the western slope through the mountains. Sometimes though the deliveries were as small as a few envelopes to be delivered from one lawyer to the next I would do that in one of the company vans. So this company was really a diverse place you would never know what the day might bring or where you will end up driving to. I really enjoyed working for this company great set of people very professional.
