Caitlin,

Jonathon came to work on Wednesday, 4/20 with a note (which is attached) that stated 3 days off.

I asked if this was work related and he stated no. I asked, with workers comp in mind and if had said yes I would have told him to call CMG immediately. I also let Jamie know that he would be off for 3 days.

Jonathon showed up for work yesterday and he said it felt ok. I asked if he was good to go, he said that he had a thumb splint and that he should be fine. When he got to work today I asked how he was and he stated that it was a little sore but he was good to go.

I just went and talked to Jonathon and he said it was sore but he was ok to work. He also told me that he noticed it was a little harder to grip at the end of the night last night.

Thanks,

Clint Schahrer

Subject: Jonathan Cavalier

Hi Clint,

We received a call from Jonathan Cavalier today regarding the pain/numbness in his hands that he's been experiencing. He stated that it is becoming aggravated again, so he wanted to call to submit a work comp claim if it was not too late. I

told him I was not sure about that, but wanted to submit the paperwork just in case and let the work comp team make the call.

He did say that he gave you a doctor's note with instructions to take off work for a few days. Do you happen to have that still? If so, could you send me a copy? I am trying to get everything put together to send to the work comp team.

Thank you!
