+1 719 243 3499

I am a very hard worker that gets along and works well with others. I originally, worked for Ranger underground back in 2016 then went to Tab Excavating around 2021, then went back to Underground fiber work on 21 of Dec. then I got laid off, due to a lack of work. In July I went to for Mears ,I ran Drill crews and did some field engineer work in Pueblo Colorado. They slowly faded out the drilling side and continued with the aerial ,I would look forward to working and prospering in your company, if hired I will not disappoint you. I m a great worker with plenty of experience and am a quick learner. Also so before Ranger Underground, I worked for Global Underground as a drill foreman for 13 years We did work for century-link I did alot of big drill work ranging from 36" steel too multiple pipes at a time.i. Hope to hear from you soon. Thank you, and have a great day!

Authorized to work in the US for any employer
