## WORK EXPERIENCE

---

### **Machinist, engineering, BAE**

January 2003 - January 2018

Defense department and aerospace manufacturer. Manual and Cnc machinist. Prototype machining.

### **Machinist, Burges Norton MFG**

January 1978 - January 2003

Burges Norton has two manufacturing plants in Geneva Illinois. Burgess Norton is a major manufacturer of components for the automotive and agricultural industries. I started working in plant 2. Plant two is a powder metal manufacturing facility mainly for the manufacturer of sintered powder metal products. I have learned all of the departments. From powder metal presses to heat treating to grinding and machining. Having g learned nearly 80 different machines. Worked 13yrs here and became grinding department supervisor.. Plant one manufactures, mainly piston pins and shafts for the automotive and truck. There I work mostly in the centerless grinding department. But also operated the presses and heat treating departments. I became supervisor for the third shift for the last two years of my service.

## EDUCATION

---

### **College of DuPage. Illinois.**

1977-1978

Automotive machining
