### **Objective**

I am seeking a suitable position in a precision machine shop, providing opportunities for professional growth and advancement, where I can utilize my education, experience, and acquired skills.

### **Skills and Qualifications**

- Knowledgeable and experienced with machine shop machines, including mills, lathes, saws, and other machines.
- Programming using conversational controllers.
- I am familiar with precision measuring tools including calipers, micrometers, indicators, height/depth gauges, and more.
- Strong mathematical skills and excellent mechanical aptitude.
- Profound personal management skills such as punctuality, well organization, rapid learner, logical thinker, precision, attention to detail, and the ability to work on several projects at once.

### **Background and Experience**

#### **Machinist, *Tucker Precision Machining* January 2012-December 2020**

Set up and ran metalworking machines including manual lathes, Haas vf-2 milling center, Bridgeports with Acu-Rite and Proto Trak controllers, horizontal/vertical saws, and grinders. Laid out and verified dimensions of parts using precision measuring equipment. Fabricated, assembled, and modified tooling and fixtures to produce parts and assemblies.

#### **Machinist, *Woodward Governor* September 2005-October 2009**

Setup and ran 50 taper Makino horizontal milling center and 4 axis Meri Seiki vertical milling center, Deburred, measured and inspected parts prior to QC to verify dimension were in tolerance to print. Kept production logs and inspection reports.

#### **Machinist, *Star Precision LLC*. February 1998-July 2005**

Set up and ran vertical milling centers including Fadal, Mori Seiki, Matsuura, and Haas. Deburred, measured, and inspected parts to verify dimensions. Kept production long and inspection reports.

#### **Machinist, *Front Range Machining* January 1982-Janurary 1998**

Ran horizontal bandsaws prior to machining. Set up and ran vertical CNC mills and operated CNC lathes.
