I'm motivated and trainable with minor automotive experience including but not limited to oil changes, tire rotations, and routine maintenance on multiple makes and brands of cars as well as two years customer service experience. I've helped my dad build and rebuild his rock crawlers my entire life which has exposed me to the automotive world through both hands-on experience and going to car shows etc. In addition, I have my own set of tools and a desire to further my knowledge and experience. I've taught myself how to both do leathercraft and make stencils which both require me to not only be good with my hands but also pay attention to small details as the smallest things make the biggest difference.

Authorized to work in the US for any employer
