Proven Logistic Coordinator Manager with a proven track record in overseeing end-to-end logistics operations. Adept at optimizing supply chain efficiency, reducing costs, and ensuring timely delivery. Demonstrated leadership in coordinating cross-functional teams to achieve organizational goals.

Willing to relocate: Anywhere

Work Experience

Independent Contractor

CAP Logistics - Denver, CO
June 2014 to Present

As a medical courier for a delivery service, responsible for timely and secure transportation of medical specimens, samples, and equipment between healthcare facilities. Ensuring adherence to safety and confidentiality protocols, maintaining accurate records, and coordinating with medical staff for efficient deliveries. Prioritizing the integrity of medical items and contributing to the smooth operation of healthcare logistics.

TSA certified to delivery from and to various government facilities and airports.

Senior Logistics Management Specialist

Fresenius Medical Care - Dallas, TX
January 2012 to January 2018

- Manage and streamline logistics processes to enhance overall supply chain effectiveness.
- Oversee transportation, warehousing, and inventory management to meet operational targets.
- Collaborate with suppliers, carriers, and internal teams to ensure timely and cost-effective delivery.
- Develop and implement strategies to optimize inventory levels, minimizing stockouts and excess inventory.
- Analyze logistics data and key performance indicators to identify areas for improvement and cost reduction.
- Ensure compliance with relevant regulations, including customs documentation and transportation safety standards.
- Lead a team of logistics coordinators, providing guidance, training, and fostering a collaborative work environment.
- Implement technology solutions for tracking shipments, managing inventory, and enhancing communication across the supply chain.
- Negotiate contracts and agreements with suppliers and logistics service providers to achieve cost savings.
- Continuously assess market trends and industry best practices to adapt and improve logistics strategies

Cyber Security Analyst

U.S. Army - Dallas, TX

May 2004 to June 2014

Developed REST API with Node.js and Express to provide backend services.

Conduct security assessments, vulnerability scans, and penetration testing using tools such as Nessus, Qualys, and Metasploit.

Monitor and respond to security incidents utilizing SIEM solutions like Splunk and ELK Stack.

Collaborate with cross-functional teams to implement and maintain security measures, including firewalls (Cisco ASA, Palo Alto), IDS/IPS (Snort, Suricata), and endpoint protection (Symantec, CrowdStrike).

Designed and implemented a Microsoft SQL 2008 server database greatly improving record keeping and access to records.

Monitored daily backups, antivirus status, shared storage space and network activity, adjusting network equipment and settings as needed.

Designed, managed and maintained group policies. Developed and supported custom backend software for use of job tracking, inventory, shipping and workflow management.
